## 1. Statutory Context

The Dog Control Act 1996 ('the Act') sets out to control specified breeds and types of dogs in two ways. First, by requiring a territorial authority to classify as menacing any dog specified in Schedule 4 of the Act (Breed and type of dog subject to ban on importation and muzzling), and secondly, by prohibiting the importation of dogs of those breeds and types.<sup>1</sup>

Schedule 4 of the Act specifies that the following breeds and types of dogs are subject to ban on importation and muzzling:

- Brazilian Fila
- Dogo Argentino
- Japanese Tosa
- Perro de Presa Canario
- American Pit Bull Terrier (type).

There is broad consensus among experts on the breeds identified in Schedule 4; the designation is based on physical characteristics, which is a well-established methodology.

However, the description 'American Pit Bull Terrier (type)' is less clear. The Act does not define what is meant by an American Pit Bull Terrier 'type'. In the absence of a clear definition, territorial authorities have used largely subjective considerations to determine whether a dog is an American Pit Bull Terrier type or predominately American Pit Bull Terrier type.

## 2. What is a Pit Bull?

The American Pit Bull Terrier (type) is not considered to be a breed, rather it is a subjective description which is commonly used to refer to mixed breed dogs with certain physical traits, such as a muscular body and broad head. Such mixed breeds usually include the American Pit Bull Terrier, the Bull Terrier, the American Staffordshire Terrier the Staffordshire Bull Terrier or a mix of these.

### 3. Guidance for identifying American Pit Bull Terrier 'Type'

The Manawātū District Council will use the guidance set out in this section to identify the American Pit Bull type.

Council will not accept DNA testing (e.g., the BITSA Breed Identification Test) as evidence of whether a dog is (or is not) wholly or predominately a Pit Bull. For a range of reasons, this testing is not always conclusive, especially where a dog is a mix of breeds.

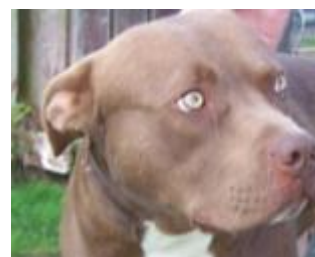

#### 3.1. HEAD

<p><b>Description</b></p>	<p><b>Head</b> – The head is large and broad. Viewed from the front, the head is shaped like a broad, blunt wedge. Viewed from the side, the skull and muzzle are parallel and joined by a well-defined, moderately deep stop. The skull is large, flat or slightly rounded, deep, and broad between the ears. Viewed from the top, the skull tapers just slightly toward the stop. There is a deep median furrow that diminishes in depth from the stop to the occiput. Cheek muscles are prominent but free of wrinkles. When the dog is focused on something, wrinkles form on the forehead.</p> <p><b>Muzzle</b>- The muzzle is broad and deep with a very slight taper from the stop to the nose, and a slight falling away under the eyes. The length of muzzle is shorter than the length of skull, with a ratio of approximately 2:3. The topline of the muzzle is straight. The lower jaw is well developed, wide and deep. Lips are clean and tight.</p> <p><b>Teeth</b> - The American Pit Bull Terrier has a complete set of evenly spaced, white teeth meeting in a scissors bite (see explanation p.7).</p> <p><b>Nose</b> - The nose is large with wide, open nostrils. The nose may be any colour.</p>
<p><b>Mesaticephalic Head Shape</b></p> <p>Medium skull with a medium muzzle. Broad at the base but short in length.</p>	<p><b>Dog Anatomy</b></p> 
<p><b>Standard Cheek Muscle</b></p> <p>Prominence of cheek muscle helps form overall head picture.</p>	<p><b>Outline</b></p> 

## Standard Flews/Jowls

Looseness and length of  
upper and lower lip.

### Examples

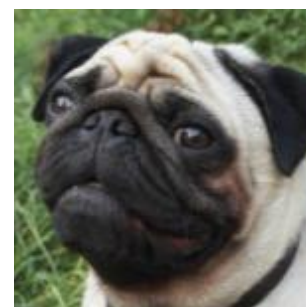

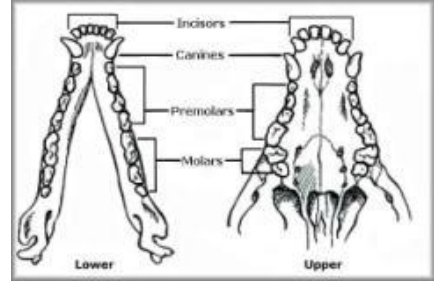

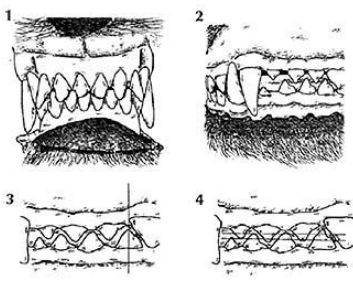

### Not Examples

Dolichocephalic e.g. Greyhound

Brachycephalic e.g. Pug

<p><b>Scissor Teeth</b></p> <p>Known as the bite, where teeth meet.</p>	Examples	
		
	Not Examples	
Undershot e.g. Bulldog		Pincer/Level e.g. Great Dane
		

3.2. EARS	Ears - Set high on the head and free from wrinkles.
	Dog Anatomy
Pointed Ear Shape	
Semi Erect Ear	
Carriage	
	Examples
Standard Ear Type	

	<p><b>Not Examples</b></p> <p>Button Shape e.g. Wirehaired Fox Terrier</p> 	<p>Bat Shape e.g. Boston Terrier</p> 	<p>Rounded Long Shape e.g. Basset Hound</p> 
	<p>Rounded Short Shape and/or Dropped Carriage e.g. Labrador</p> 	<p>Erect Carriage e.g. German Shepherd</p> 	<p>Rose Carriage e.g. Greyhound</p> 

### 3.3. EYES

Eyes - Eyes are medium size, round to almond-shaped, and set well apart and low on the skull.

#### Almond Eye Shape

##### Examples

##### Not Examples

Round Shape e.g. Pug

Triangular Shape e.g. Bull

#### Standard Eye Type

##### Examples

##### Not Examples

Protruding Type e.g. Chihuahua

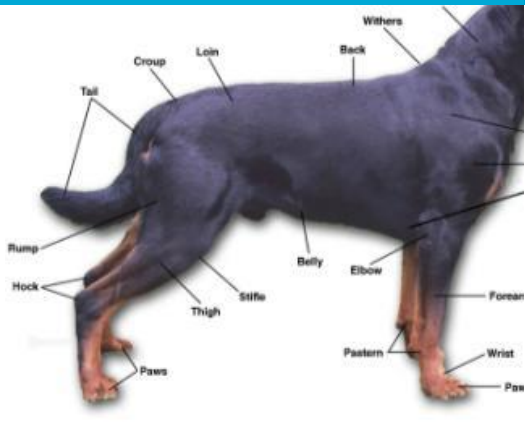

Deep Type e.g. Shar Pei

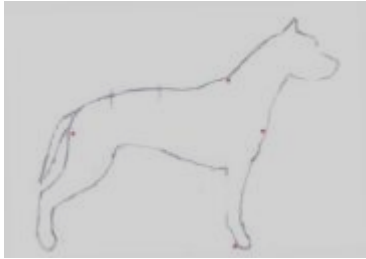

Standard Eye Set	Examples	
Eye position in the skull.		
	<b>Not Examples</b> <b>Wide Set e.g. Amstaff</b> 	<b>Oblique Set e.g. Greyhound</b> 

### 3.4. BODY

<b>Description</b>	<p><b>Neck</b> - The neck is of moderate length and muscular. The neck should be narrowest just behind the ears and widen downward gradually to blend smoothly into the withers (top of the shoulders). The skin on the neck is tight and without dewlap.</p> <p><b>Forequarters</b> - The shoulder blades are long, wide, muscular, and well laid back. The upper arm is roughly equal in length to the shoulder blade and joins it at an apparent right angle.</p> <p>The forelegs are strong and muscular. The elbows are set close to the body. Viewed from the front, the forelegs are set moderately wide apart and perpendicular to the ground. The pasterns are short, powerful, straight, and flexible. When viewed in profile, the pasterns are nearly erect.</p> <p><b>Back</b> – The back should be short and strong, slightly sloping from withers to rump. The top-line should be slightly higher at the withers than at the rump, with subtle arch just over the loin area.</p> <p><b>Chest</b> - The chest should be deep, but not too broad, with wide-sprung ribs. As the fore chest (also known as the brisket) goes down between the front legs to meet the chest, the fore chest should be deep enough at its lowest point to be even with the dog as elbow when viewed by the side.</p>
<b>Medium Height</b> Between 30-45cm.	<b>Dog Anatomy</b> 

	<div data-bbox="523 152 1495 197" data-label="Section-Header"> <p><b>Examples</b></p> </div> <div data-bbox="544 250 900 533" data-label="Image"> </div> <div data-bbox="997 250 1305 533" data-label="Image"> </div> <div data-bbox="523 555 715 589" data-label="Section-Header"> <p><b>Not Examples</b></p> </div> <div data-bbox="523 611 909 645" data-label="Text"> <p>Small e.g. Jack Russell Terrier</p> </div> <div data-bbox="639 658 801 938" data-label="Image"> </div> <div data-bbox="997 611 1256 645" data-label="Text"> <p>Large e.g. Labrador</p> </div> <div data-bbox="997 658 1337 938" data-label="Image"> </div>
<p><b>Deep Chest Shape</b></p>	<div data-bbox="523 963 1495 1008" data-label="Section-Header"> <p><b>Examples</b></p> </div> <div data-bbox="598 1021 837 1339" data-label="Image"> </div> <div data-bbox="956 1021 1133 1339" data-label="Image"> </div> <div data-bbox="1187 1021 1369 1348" data-label="Image"> </div> <div data-bbox="667 1377 837 1624" data-label="Image"> </div> <div data-bbox="997 1377 1390 1624" data-label="Image"> </div> <div data-bbox="523 1646 715 1680" data-label="Section-Header"> <p><b>Not Examples</b></p> </div> <div data-bbox="523 1702 777 1736" data-label="Text"> <p>Barrel: e.g. Bulldog</p> </div> <div data-bbox="662 1744 900 1995" data-label="Image"> </div> <div data-bbox="1002 1702 1442 1736" data-label="Text"> <p>Ovoid/Standard: e.g. Jack Russell</p> </div> <div data-bbox="1013 1744 1284 2000" data-label="Image"> </div>

<b>Stocky Build</b>	<p><b>Examples</b></p> 
	<p><b>Not Examples</b></p> <div> <p>Solid: e.g. Mastiff</p>  </div> <div> <p>Fine: e.g. Greyhound</p>  </div>
<b>Standard Body Length</b>	<p><b>Examples</b></p> 
	<p><b>Not Examples</b></p> <p>Elongated e.g. Dachshund</p> 

	Examples	
<p><b>Sloping Topline</b></p> <p>Gradient of the back from the withers to the rump.</p>	 	 
	<p><b>Not Examples</b></p> <p>Level Topline e.g. Rottweiler</p> 	<p>Rising Topline e.g. Greyhound</p> 

### 3.5. SKIN & COAT

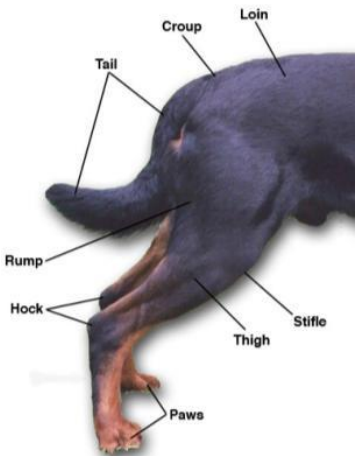

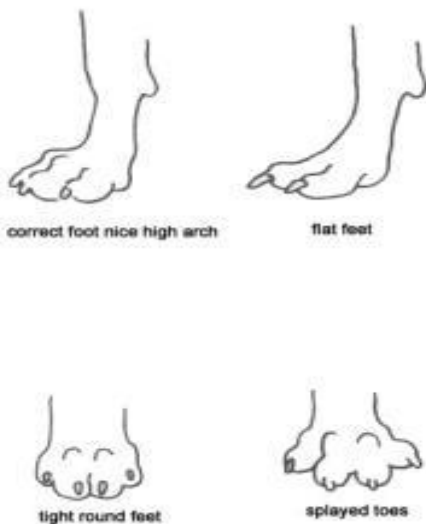

**Coat** - The coat is glossy and smooth, close, and moderately stiff to the touch. The hair should be rather course in texture.

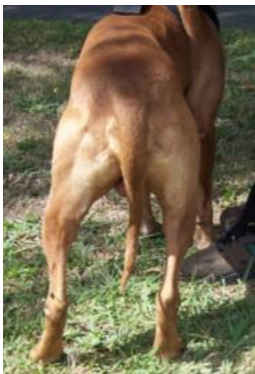

Examples			
<b>Standard Skin</b>  Refers to the tautness of the skin.			
<b>Short Coat Length</b>			
<b>Smooth Coat Type</b>	<b>Not Examples</b> Excess Skin e.g. Shar Pei 	Wire Haired Type e.g. Wire Haired Pointer 	Curly Haired Type e.g. Poodle 
	Hairless Type e.g. Chinese Crested 	Long Coat Length e.g. Afghan Hound 	Medium Coat Length e.g. Border Collie 

### 3.6. COAT COLOUR

Examples of Colours	Examples		
	<b>Black</b> 	<b>Black &amp; White</b> 	<b>Tan</b> 
	<b>Tan &amp; White</b> 	<b>Chocolate</b> 	<b>Chocolate &amp; White</b> 
	<b>Brindle</b>   		
	<b>Cream</b> 	<b>White</b> 	<b>Black and White</b> 

### 3.7. LEGS

<b>Description</b>	<p><b>Hindquarters</b> - The hindquarters are strong, muscular, and moderately broad. The rump is well filled in on each side of the tail and deep from the pelvis to the crotch. The bone, angulation, and musculature of the hindquarters are in balance with the forequarters. The thighs are well developed with thick, easily discerned muscles. Viewed from the side, the hock joint is well bent and the rear pasterns are well let down and perpendicular to the ground. Viewed from the rear, the rear pasterns are straight and parallel to one another.</p> <p><b>Legs and Feet</b> – The front legs should be strong and sturdy. The feet should point directly to the front, not towards each other or away from each other. The pasterns (which are the lower part of the front leg, from the joint just above the foot down to the foot) should stand erect and strong.</p>
<b>Medium Leg Length</b>	<p><b>Dog Anatomy</b></p> 
<b>Bowed Leg Shape</b>	<p><b>Dog Anatomy</b></p> 

	Examples		
Well Developed Thigh Muscles			
			
			
	<b>Not Examples</b> Long Legged e.g. Great Dane 		Short Legged e.g. Maltese Terrier 

	<p>Straight Leg Shape e.g. Wirehaired Fox Terrier</p> 	<p>Crooked Leg Shape e.g. Lhasa Apso</p> 
--	---	--

### 3.8. TAIL

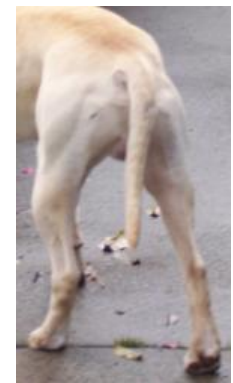

**Tail** - The tail is set on as a natural extension of the top-line, and tapers to a point. When the dog is relaxed, the tail is carried low and extends approximately to the hock. When the dog is moving, the tail is carried level with the backline.

#### Medium Tail Length

#### Low Tail Carriage

The way the tail is commonly presented and carried.

#### Bee Sting Tail Type

Medium and tapered.

	<p><b>Not Examples</b></p> <p>Long Tail e.g. Irish Wolfhound</p> 	<p>Short Tail e.g. Boston Terrier</p> 
	<p>High Carriage e.g. Scottish Terrier</p> 	<p>Screw Type e.g. Bulldog</p> 
	<p>Curl Type e.g. Basenji</p> 	<p>Whip Type e.g. Pointer</p> 
	<p>Plume e.g. English Setter</p> 	<p>Crank Type e.g. Staffordshire Terrier</p> 
	<p>Spitz Type e.g. Samoyed</p> 	<p>Straight Type e.g. Airedale Terrier</p>
