This list of archaeological sites is from the NZ Archaeological Association file of Recorded Sites. It has been compiled from individual surveys over time, and is not the result of a systematic survey of the District. There will be other archaeological sites that have not been recorded. The existence of a recorded site often indicates that it is likely that there will be further sites nearby. The sites are located by the grid reference, which is the southwest corner of a 100 metre square. Further information can be obtained from the NZ Archaeological Association.

Appendix 1G – [\[DELETED PC46\]](#)

Appendix 1H – [\[DELETED PC46\]](#)

APPENDIX 1I – CRITERIA FOR ASSESSING THE SIGNIFICANCE OF NATURAL AREAS

Refer Rules A1.3.4 A) and C3.2.1 C).

Purpose of Plan Criteria

Council will use the criteria set out below to:

- a) Help assess applications for assistance with fencing and enhancement of particular **natural areas** under **Council's** proposed heritage incentives programme.
- b) Assess requests from landowners and others to include specific **natural areas** in Appendix 1, to protect any **natural area** via covenant under the Reserves Act 1978, or to place a heritage order over a particular area.
- c) Assess whether an **esplanade strip** for conservation purposes is warranted in terms of Rule C3.2.1.
- d) Assess applications for discretionary or non-complying land use or subdivision consents which have potential **effects** on **natural areas**, including applications to modify the areas listed in Appendix 1B under Rule A2.3. (Refer also Rule A1.3.4 a. xiv).
- e) Assess applications for subdivision consent where the Plan's rules require protection of a **natural area** as a condition of approval (Refer Rules C1.3.1 a. i) and C2.4.1 j.).
- f) Consider acquiring **natural areas** depending on the merits of the particular case.

Criteria

Whether the **natural area** concerned:

- 1) Contains indigenous ecosystems that are poorly represented in the ecological district*.
- 2) Contains an indigenous ecosystem that is typical of the character of the ecological district.
- 3) Contains associations of indigenous species which are unusual for their abundance or diversity within the ecological district.
- 4) Supports ecosystems or indigenous species that are rare, vulnerable, or endangered within an ecological district or nationally (including areas of exotic vegetation).
- 5) Forms part of a complex of habitat which aids the maintenance or recovery of threatened species, e.g. is part of a linking corridor or buffer area.
- 6) Makes an important contribution towards the habitat requirements of indigenous species other than those regarded as threatened.
- 7) Is largely in its natural state.

- 8) Has a significant role in linking **natural areas** by providing part of a corridor or buffer **zone** between other **natural areas** or the coast.
- 9) Contains physical landforms or geology which is nationally or regionally uncommon.
- 10) Is of a sufficient size for the natural processes occurring there to be ecologically self-sustaining, or have the potential to reach this state.
- 11) Has met the criteria to be set aside under covenant or statute for preservation or protection, or identified as a Recommended Area for Protection (RAP) or Site of Special Biological Interest (SSBI) by the Department of Conservation.
- 12) Has significant landscape, scenic, recreational or aesthetic qualities.
- 13) Has potential for habitat or ecosystem restoration, including the possibility of expanding its size for regeneration, or
- 14) Has conservation benefits such as the maintenance of water quality or in-stream habitat, or soil conservation benefits.

The areas listed in Appendix 1B all meet these criteria to varying degrees. The Category A forest areas have been identified by DoC's RAP survey as being the most significant among them.

*Ecological districts are distinguished by a combination of factors, including climate, geology, landform, soils and biological features that form a recognisable ecological pattern different to that of neighbouring areas. The Manawatu District Council's area includes part of five ecological districts, namely the Foxton (sand country), Manawatu Plains, Rangitikei (hill country), North Manawatu Gorge, and Ruahine ecological districts.

APPENDIX 1J – CLEARANCE OF INDIGENOUS VEGETATION

Refer Rules B3.1.1, B7.1.1.

NB: This rule shall not apply to the heritage places listed in Appendices 1A or 1B of the Plan. Rules on the modification of these places are instead contained in Rule A2.3.

PERMITTED

1. Clearance, modification or harvesting of **indigenous vegetation** shall be a permitted activity if it meets any one of Rules a) to f) below:
 - a) The activity is limited to wind thrown trees or trees that have become dangerous to human life or property.
 - b) The activity is limited to **indigenous vegetation** which has been planted and managed specifically for the purpose of harvesting or clearance.
 - c) The activity is limited to **indigenous vegetation** that occurs underneath exotic plantation forestry.
 - d) The activity is associated with the operation and maintenance or minor upgrading of existing utilities, but excluding their expansion.
 - e) The activity is necessary for the maintenance of existing tracks, or existing structures such as farm troughs and fencelines.
 - f) The activity is limited to clearance, modification or harvesting of an agricultural or horticultural crop, (including grazing pasture).
2. Clearance, modification or harvesting of **indigenous vegetation** (except the clearance, modification or harvesting of **indigenous vegetation** listed in 3 below) shall also be a permitted activity if it meets any one of Rules a) to c) below:
 - a) The activity is limited to vegetation consisting of early successional manuka, kanuka, bracken or ring fern which has grown naturally from previously cleared land (i.e. regrowth) in the period up to 10 years before the date of clearance and modification.
 - b) The activity does not include:
 - i. An area of **indigenous vegetation** over one hectare with an average canopy height of at least 6m; or
 - ii. An area of **indigenous vegetation** of 5ha or greater which has an actual or emerging predominance of indigenous tree species of any height (where 'tree species' is any species which may attain a diameter at breast height of 30cm or greater).
 - c) The activity is limited to no more than 50m³ of timber per 10 year period per certificate

of title, solely for private use (i.e. shall not be sold or gifted to a third party) or for use by tangata whenua for culturally appropriate purposes such as rongoa, waka, traditional buildings or marae-based activities.

RESTRICTED DISCRETIONARY

3. Despite Rule 2 above, the clearance, modification or harvesting of **indigenous vegetation** shall be a restricted discretionary activity if:
 - a) The activity involves the clearance, modification or harvesting of **indigenous vegetation** within a **wetland**, or
 - b) The activity involves the clearance, modification or harvesting of **indigenous vegetation** within the coastal vegetation area shown on the Planning Maps, and the vegetation concerned is not within an artificially-created **wetland** or within an area of production forest or pasture.
4. Clearance, modification or harvesting of **indigenous vegetation** shall also be a restricted discretionary activity if the activity involves the clearance, modification or harvesting of **indigenous vegetation** not permitted under 1 or 2 above.
